Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to a method of forming a protective layer of fluorine wherein the fluorine is applied by plasma reaction.

Group II, claim(s) 10-15, drawn to a method of forming a protective layer of fluorine wherein the fluorine is applied by immersion.

Group III, claim(s) 7-9, drawn to a cutting blade.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The method of claim 1 is substantially different than the method of claim 10 since plasma reaction is substantially different than immersion. The blade of claim 7 can be formed by methods different than the methods of claims 1 and 10.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be
